Performance shown represents past performance and cannot guarantee future results.

Current performance may be lower or higher than that shown. Investment return and principal value will fluctuate. Shares, when redeemed, may be worth more or less than their original cost. Class A shares have a maximum front-end sales charge of 4.50%. Absent reimbursements and/or fee waivers, the fund's 30-day SEC yield would have been 3.27% and 3.92% for Classes A and I, respectively. Total returns assume the reinvestment of all distributions at net asset value and the deduction of all expenses. Performance would have been lower if fees had not been waived in various periods. Performance data current to the most recent month-end is available at www.wilmingtonfunds.com.

¹The fund's advisor, distributor and shareholder services provider have agreed to waive their fees and/or reimburse expenses so that the total annual fund operating expenses paid by the fund's Class A Shares and Class I Shares will not exceed 0.78% and 0.43%, respectively, not including the effects of taxes or extraordinary expenses. This waiver may be amended or withdrawn after August 31, 2025, or with the agreement of the fund's Board of Trustees. Please see the prospectus for more information on fees, expenses, and expense limitation arrangements, if any.

Sector allocation and credit quality percentages are based on the total portfolio as of quarter-end and are subject to change at any time. This data is shown for informational purposes only and is not to be considered a recommendation to purchase or sell any security. The credit quality of the investments in the fund's portfolio does not apply to the safety and stability of the fund and are subject to change. Ratings shown are assigned by one or more Nationally Recognized Statistical Rating Organizations (NRSRO), such as Standard & Poor's, and typically range from AAA (highest) to D (lowest). When ratings from two NRSROs are available, the lowest rating is used. Bonds not rated by an NRSRO are included in the Not Rated category, which does not necessarily indicate low quality. Cash is defined as bonds with stated maturities of seven days or less and includes money market funds and other cash equivalents. Important Information And Risk Disclosure

All investments involve risk, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks. As interest rates rise, the value of fixed income securities falls. High yield bonds possess greater price volatility, illiquidity, and possibility of default. Asset-backed, mortgage-backed or mortgage-related securities are subject to prepayment and extension risks. There is no assurance that any investment strategy will be successful. Please see the prospectus/summary prospectus for information on these and other risk considerations.

Diversification does not ensure a profit or guarantee against a loss. There is no assurance that any investment strategy will be successful. Any investment in the fund should be part of an overall investment program rather than, in itself, a complete program.

Indices are not available for direct investment. Investment in a security or strategy designed to replicate the performance of an index will incur expenses, such as management fees and transaction costs, which would reduce returns.

This material does not constitute a recommendation of a particular security, nor is it an offer to sell, or solicitation of an offer to buy, fund shares. Effective duration provides a measure of a fund's interest rate sensitivity. **Weighted average maturity** is the average length of time for which debt instruments in the portfolio are due and payable. **Alpha** is a measure of performance on a risk-adjusted basis. The excess return of the fund relative to the return of the benchmark index is a fund's alpha. **Beta** is a measure of a portfolio's volatility, or systematic risk, in comparison to the market as a whole. A beta below 1 indicates less volatility than the market; a higher beta indicates more volatility. **R-squared** measures how closely a fund's performance correlates with that of its benchmark, thus representing how much of the fund's performance can be explained by the overall market or index. 1 indicates perfect correlation; 0 indicates no correlation. **Sharpe ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard deviation** indicates the percentage by which a portfolio's performance has varied from its average performance in any given month during the period indicated. The higher the standard deviation, the greater the range of performance, indicating greater volatility.

The **Bloomberg U.S. Aggregate Bond Index** is a broad-based bond index comprised of government, corporate, mortgage and asset-backed issues, rated investment grade or higher, and having at least one year to maturity. Please note that an investor cannot invest directly in an index.
